

DCI Donor Services Tissue Bank
an extraordinary commitment to science, health and hope

“I realized that my young son thinks of me as this kind of ‘superhero’ just like I think of my dad.”

Read more about Donovan, an allograft recipient, inside.

**Allograft
Resource Guide**

Volleyball, A Bike and Donation Prepare A Real-Life Superhero

Sixteen years ago, Donovan Degalau was playing rec-league volleyball when he landed awkwardly, rupturing his Anterior Cruciate Ligament (ACL). Faced with surgery, Donovan's surgeon chose to replace his tendon with a ligament from a tissue donor. Before long he was able to resume an active lifestyle, and though he "retired" from volleyball he was able to return to his first passion, which is road cycling.

Six years later, Donovan's dad was diagnosed with primary sclerosing cholangitis, a chronic disease that damages the bile ducts and slowly causes the liver to shut down. Needing a life-saving liver transplant to survive, Donovan discovered he was a match, making him eligible to be a living donor. Unfortunately, the day of surgery the surgeons discovered Donovan had a rare congenital problem with his portal vein and atypical branches in his liver. He was crushed to learn he was not a candidate to help his father.

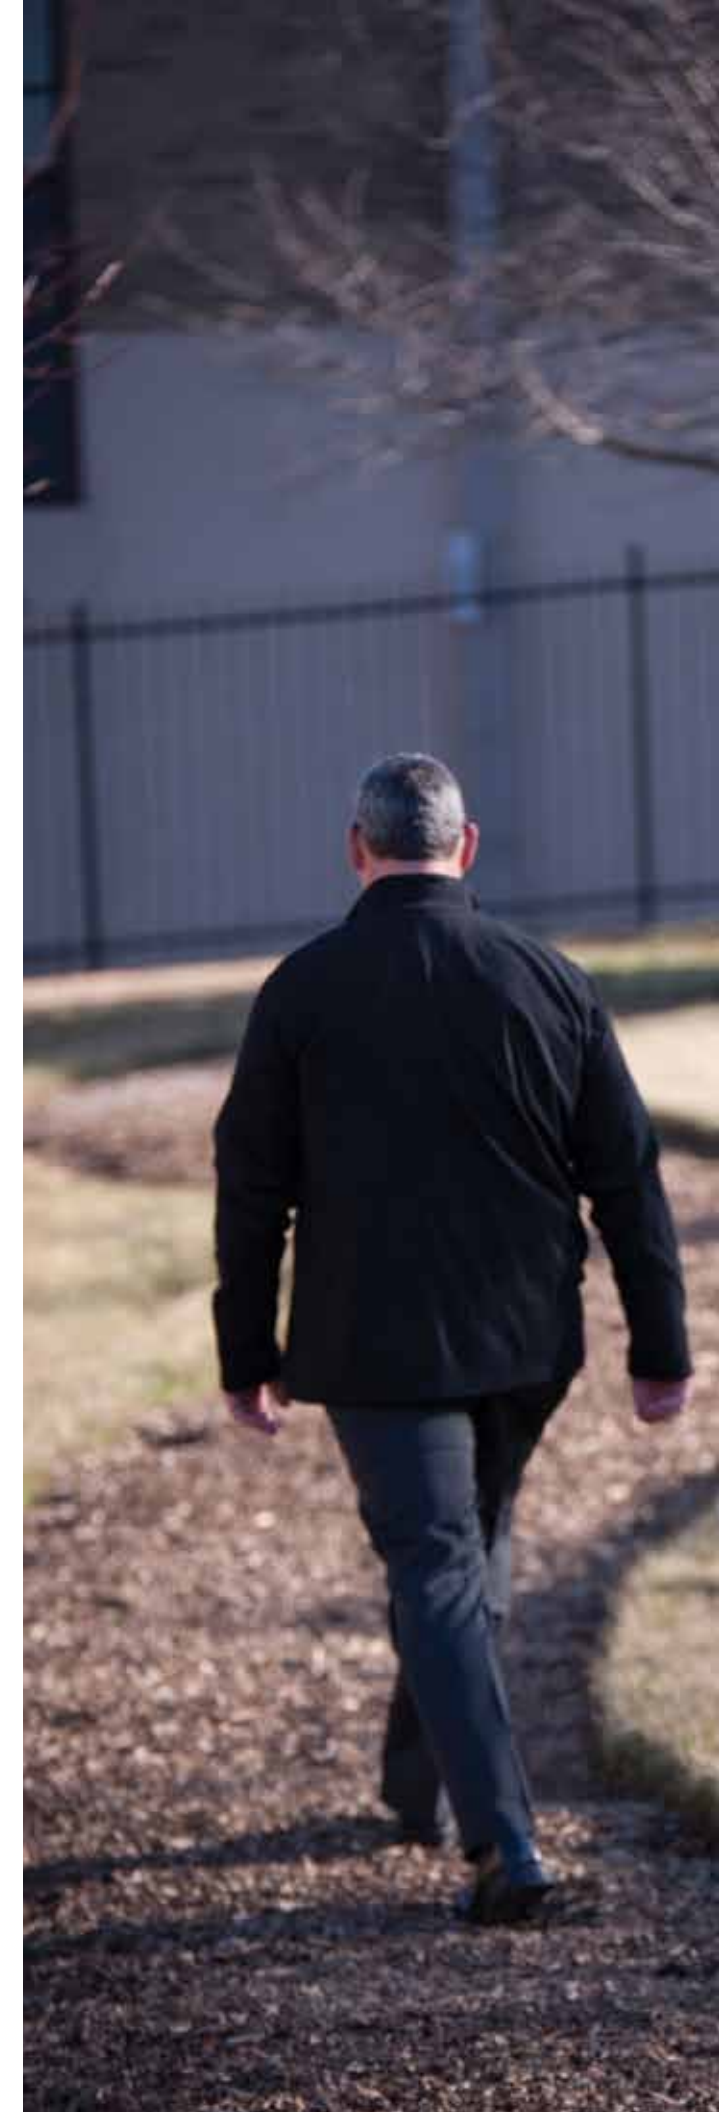

Thankfully, Donovan's dad received a transplant a couple days later, and recently celebrated his 10-year anniversary as an organ recipient.

"My dad is my hero, and I wanted to do something for him, but on that day I wasn't able to," said Degalau. "When my family started growing, I realized that my young son thinks of me as this kind of 'superhero' just like I think of my dad." That's select company considering his son's fascination with superheroes (that's Donovan's son, pictured on the cover).

Based on his experience, Donovan poured his energy into cycling, understanding that his life enhancing gift allows him "to honor my dad, and the process of donation." Recognizing his role as both a tissue recipient and very nearly an organ donor, he has begun sharing his story with others to promote the idea of donation. To Donovan's dad and son, he doesn't need a costume or cape to be considered a hero.

"I'm amazed to be able to now share the story of how a volleyball accident, a bike and my kid's Spiderman costume made me realize how important and impactful the recipient and the donor are in the donation and transplantation process."

Donovan knows that every day is a gift that must be cherished. Even though he's not willing to say it, that makes him a superhero in our book.

An Extraordinary Commitment to Science, Health and Hope

DCI Donor Services Tissue Bank is committed to saving and enhancing lives. We provide allograft implants that promote safe and natural biologic healing through the work of dedicated professionals who share an extraordinary commitment to science, health and hope.

For nearly 30 years, DCI Donor Services Tissue Bank has been an integral part of the DCI Donor Services family of companies. Together, we have provided organs for transplant and access to quality allografts.

Our services include:

- Management, placement and recovery of donated organs through a network of federally-designated organ procurement organizations in three states. Our advanced organ and tissue recovery program includes 24-hour availability of technical teams in the communities we serve.
- Processing of donor tissue following stringent safety standards and good manufacturing practices prescribed by federal and state regulatory agencies and industry governing bodies.
- Distribution of allograft implants used in spine, sports medicine, general orthopaedic, oral-maxillofacial and burn wound management procedures.

DCI Donor Services Tissue Bank is uniquely positioned to serve our communities, both as the steward of the gifts so generously shared by donors and their families, and as a provider of the resulting allograft therapies to help patients in need.

We are committed to serving as the preferred provider of allografts in the communities where donor tissue is recovered. As a tissue bank that maintains complete control of each donor tissue — from recovery through distribution — DCI Donor Services Tissue Bank is recognized by healthcare providers as a valuable and reliable partner.

Surgeons demand safe and effective treatment options for their patients. DCI Donor Services Tissue Bank offers allografts that promote natural biologic healing while giving patients peace of mind.

Spinal Allografts

Advancement in spine technology drives expectations about treatment options and quality outcomes.

DCI Donor Services Tissue Bank supplies allograft spinal implants that promote safe and natural biologic healing. We deliver customized sizes and configurations to help overcome surgical challenges and offer patients peace of mind.

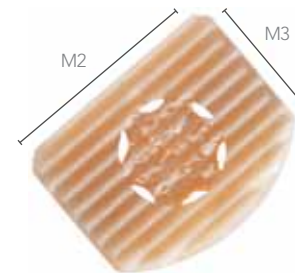

"I am grateful for the donors who chose to donate life, so I could return to mine."

BONE VOID FILLERS

The DCI Donor Services Tissue Bank portfolio of bone void fillers consists of morselized allograft bone offered in various forms for application in spine, trauma and general orthopaedic surgery.

These grafts promote bone formation, optimize healing and accelerate patient return to function.

"I have had the pleasure of having DCI Donor Services Tissue Bank serve at our facility as a trustworthy friend/vendor for our patients and surgeons. I am very impressed with the respect shown towards the donors and families as their unselfish gifts impact the lives of so many others."

Marvin Wilson CST, CSA, BS
Implant Coordinator
Nashville, TN

Bone Void Fillers

Reficio™ DBM Paste, Putty, Plus

Reficio™ DBM is a validated osteoinductive demineralized bone matrix in a natural lecithin carrier, and is available as a 40% DBM putty, a 35% DBM paste, or 35% DBM Plus pre-mixed with resorbable coralline hydroxyapatite granules.*

The natural quality of the carrier and its outstanding containment and handling characteristics enable the surgeon to mold it to surgical sites, even in the presence of excessive fluids and under lavage.

GENERAL ORTHOPAEDIC ALLOGRAFTS

Allografts have a clinical history in joint repair procedures dating back to the early 20th century.

Today allografts are a valuable treatment modality for joint repair when the surgical goals are to improve function and preserve joint integrity, particularly in the event future revision may be needed.

Sports Medicine Allografts

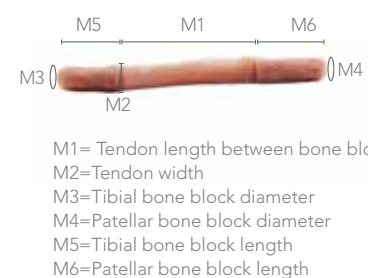

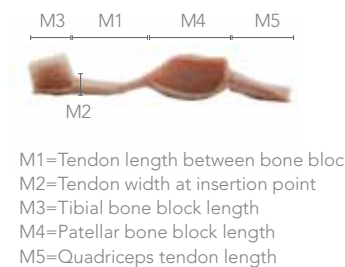

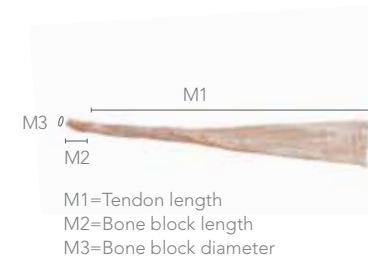

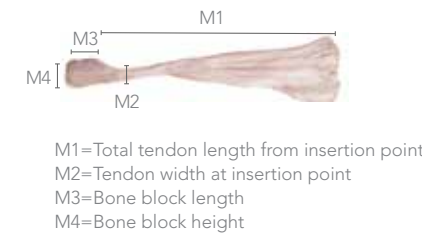

SPORTS MEDICINE ALLOGRAFTS

Patients with connective tissue damage demand treatment options that will restore their ability to move freely. DCI Donor Services Tissue Bank offers surgeons innovative biologic solutions to trauma, sports and age-related injuries.

We deliver safe, high-quality allografts to simplify and standardize procedures and keep people moving.

“There is no doubt that millions of people in this world take pride in their work. But our work goes beyond pride. Each day we can honor an individual’s last gift in life simply by performing our jobs. Our work is a privilege.”

Michael Irwin
Production Manager
DCI Donor Services Tissue Bank

Our son was pronounced brain dead on July 9, 2012. It was so important to my husband and me that something good come from this. We gave consent to recover Caleb's kidneys, liver and heart for heart valves, along with his corneas, skin and bone with connective tendons and ligaments. We know there are those out there living healthy, productive lives because of Caleb's gift.

Becky Holman
Donor Mother
Quality and Regulatory Manager
DCI Donor Services Tissue Bank

SPECIALTY AND WOUND ALLOGRAFTS

Our specialty and wound healing allografts offer hope and healing to patients requiring care for critical burn injuries, neurosurgical repair and other unique needs.

These treatment modalities remind us that by offering hope we give life; both to the generous donors and families who make transplantation possible and to the patients whose lives are saved and enriched by the resulting medical therapies.

IMPLANT DENTISTRY ALLOGRAFTS

The DCI Donor Services Tissue Bank portfolio of implant dentistry allografts offers ideal solutions for rebuilding atrophied bone. These graft forms provide alternatives to autograft without the need for a second surgical site. Our allografts help promote structural integrity, supporting the integration of dental implants.

DCI Donor Services Tissue Bank offers bone regeneration allografts that build winning smiles and promote dental health.

"I have been working with DCI Donor Services Tissue Bank allografts for a couple of years. The service is very personal and efficient. My inventory never goes low and the allografts are of great quality."

Erika Smith MacDonald, MD
Bellevue, WA

Quality

Allograft Quality and Safety

The advanced tissue processing and robust quality systems used by DCI Donor Services Tissue Bank assure each allograft meets safety and regulatory requirements. Quality standards are written to meet regulations established by the U.S. Food and Drug Administration (FDA), standards of the American Association of Tissue Banks (AATB), and other state guidelines as appropriate.

Registrations & Licensure

- U.S. Food and Drug Administration (FDA)
- American Association of Tissue Banks (AATB)
- State of California
- State of Florida
- State of Maryland
- State of New York
- State of Oregon

We are routinely audited by these agencies.

DCI Donor Services Tissue Bank credentials can be found at:
<http://tissuebank.dcids.org/who-we-are/credentials/>.

Ordering and Customer Service

DCI Donor Services Tissue Bank is dedicated to saving and enhancing lives by providing high-quality allografts for implantation in spine, sports medicine, orthopaedic, cranio-maxillofacial and burn and wound management surgeries. By mobilizing the power of people and the potential of technology, we extend the reach of each donor's gift and enhance patients' lives.

DCI Donor Services Tissue Bank offers a variety of bone and soft tissue allografts to meet surgical needs and routinely fills special requests. Please call **800.216.0319** to place an order. The distribution center is staffed between 7:30 AM and 6:30 PM, Central Time. In addition a staff member is on call after hours to assist with emergency cases.

Shipping: DCI Donor Services Tissue Bank is committed to ensuring that all shipments arrive on time and offers flexible shipping to meet this goal. Individual courier and STAT fees apply on a case-by-case basis. If applicable, these fees will be explained at the time an order is placed. Shipping and handling fees are itemized on each invoice.

Return Policy: Allografts may be returned for credit (less a handling fee) when doing so does not compromise safety or viability for future use. DCI Donor Services Tissue Bank accepts allografts for return under the following circumstances:

- Packaging must be intact and unopened.
- Allografts must be maintained and returned in the appropriate environment. Frozen allografts must be returned on dry ice and maintained between -40°C and -80°C. Freeze-dried allografts must be maintained at ambient temperature.
- The returning facility is responsible for facilitating shipment and payment arrangements.
- Contact DCI Donor Services Tissue Bank Distribution at **800.216.0319** to obtain a Return Authorization Number (RA#) prior to shipping a returned allograft. The returning facility must complete and sign the Tissue Return Declaration Form documenting that all required criteria have been met for the return.

DCI Donor Services, Inc.

DCI Donor Services' family of companies includes DCI Donor Services Tissue Bank and Organ Procurement Organizations in California, New Mexico and Tennessee. Sierra Donor Services is the transplant donor network responsible for the Sacramento, California and Reno, Nevada areas. New Mexico Donor Services and Tennessee Donor Services cover those states, respectively. We save and enhance lives by connecting people through organ and tissue donation and transplantation. Our unique approach to service allows for nationwide donation, transplantation, and distribution of organs and tissues while maintaining strong community ties.

We are proud to foster an environment where selfless professionals are committed to our life-changing work. Our performance is measured by the impact we have on the lives of donor families who make transplantation possible, and the patients whose lives are saved and enhanced by their gifts. By mobilizing the power of people and the potential of technology, we extend the reach of each donor's gift to maximize the *Gift of Life*.
